# ECO FRIENDLY. BUDGET FRIENDLY. USER FRIENDLY.

Green2Go is all about eco-friendly rental power and light products that are budget friendly as well. Have you priced a rental portable generator lately? Whoa! A few years ago we saw a trend in rental power. That trend was one where the customer would feel the pinch right in the pocketbook. Rental power can be expensive and complicated. Green2Go Rental Power & Light fixed that. Eco friendly, budget friendly, user friendly.

## 24/7 RESPONSE

Whenever you need us, we are available

## SMALL FOOTPRINT

Bigger is not always better when it comes to rental power & light

## EASE OF USE

Green2Go rents machinery even the casual user can operate

## TURNKEY SYSTEMS

Don't want to fuss with it? Green2Go will handle everything

## RENTAL POWER

### ALTERNATIVE FUEL

Green2Go Rental Power & Light features the industries first portable generator to use clean burning LPG fuel. While lowering your operational costs, G2G generators and electrical equipment keep your project safe, in budget, and friendly to our planet.

### TRADITIONAL FUEL

Green2Go Rental Power & Light has inventory of the latest in diesel fired power generating equipment. Using tier IV engines, Green2Go Rental Power & Light has the correct machine for the application while always keeping the environment in mind.

## RENTAL HVAC

### HEATING & AIR CONDITIONING

HVAC solutions are as smart and easy on the pocketbook as our other products. Contact us to discuss the correct solution for your project or special event.

## RENTAL LIGHT

### TOWABLE LIGHTING

With improvements in LED technology, portable lighting has never been more efficient. Green2Go Rental Power & Light has field lighting systems that save you money by lowering your operational costs. Using much less fuel than traditional light plants, G2G reduces the environmental impact while you save \$\$.
